

LEARNFLEX™ MOBILE

LearnFlex™
mobile

MANAGE YOUR LEARNING ON THE GO!

Nowadays, mobile telephones can be used for much more than simply making phone calls. Smart phone devices are evolving into platforms for collaboration, knowledge access and performance support. Investing in a mobile solution to manage your learning ensures your organization improves communication and allows rapid access to knowledge.

LearnFlex™ Mobile offers a set of standard LearnFlex™ features that enable you to manage your Learning Plan from anywhere at any time.

WHY CHOOSE LEARNFLEX™ MOBILE

Enhance knowledge – Effectively make it easy for your employees to have access to knowledge by:

- Viewing their pending manager approvals.
- Approving or denying course requests.
- Allowing your employees to view the top ten newest and hottest courses that have been added to LearnFlex™.

Improve communication and organization – Save your time and manage your learning activities by:

- Reading all messages that exist inside the LearnFlex™ Message Centre.
- Allowing your employees to view their currently registered courses.
- Providing your employees a list of all courses that have been completed.

FEATURES

General Features

- Dynamic language: change language on the fly.
- Branding: Community based branding allows for the same flexibility found inside LearnFlex™ today.
- Passwords: check box called “Remember me” is available when logging in. This function will save your encrypted login credentials for two weeks from your last successful mobile login.
- Use single sign on to reduce excessive passwording.

User Menu

- **Messages:** it is a compact version of the LearnFlex™ Message Centre. It displays all the messages sent to the LMS user, with the most recent at the beginning and five per screen. The total number of new messages in the Message Centre is indicated in the main Messages link. Once the user is in the Message Centre, links are available so that it is possible to navigate through the messages and read their contents. For convenience, titles of unread messages are bolded, and the icon also changes depending if the message has been read or unread. The date and time when it was received is also displayed.
- **Learning Plan:** displays courses (not bundles) in which users are currently registered. Courses are listed in alphabetical order, with five entries per screen. The registration date and time, as well as the user's status in the course, are also displayed. From this menu, it is possible to view details about the course, such as instructional media type, delivery provider, associated competencies, and so on. It is also possible to access session information, which indicates the start and end date of the session, the name of the presenter (when available), and the last day users can drop out of the session.
- **Courses:** displays the top ten newest and hottest courses that have been added to LearnFlex™. For both lists, each course has a link that provides course details, such as subject, competency authority, and course credit hours.
- **Achievements:** displays all courses, in alphabetical order that a user has achieved. It also displays the registration date and time, completion date and time, user status in the course (Passed or Failed), and user grade. It is possible to access course information by clicking the appropriate link, and from there, session information.

Admin Menu

- **Manager Approval:** allows managers to approve or deny user requests to enroll in learning activities. As per other screens, all learning activities are listed in alphabetical order, with a maximum of five learning activities per screen. After managers approve or deny the request, the learning activity is removed from the list and a message indicating approval or denial is sent to the requesting user. For individual courses, it is possible to view both course and session details by clicking the appropriate link.

LearnFlex™ Mobile offers a number of new features that allow your employees to manage their learning plans from anywhere, at any time. Operitel Corporation continuously works toward improving and upgrading its solutions, making changes based on suggestions from clients, as well as world learning technologies in order to proactively come up with feature sets like those described below:

- **Registration:** ability to search and register for non-E-Commerce learning activities.
- **Course Launch:** ability to launch courses directly from your mobile device.
- **Assessments:** ability to launch and track assessment inputs from mobile devices.
- **Message Center:** added ability to delete messages from your mobile device.
